Class Outline & Syllabus

AutoCAD Electrical Intermediate

Course Length: 2 days (16 hours)

Objective: Learn how to customize databases and other reference files to tailor AutoCAD® Electrical software to specific projects and company requirements. Also learn how to be more productive by updating title block attributes, generating automatic reports, using PLC I/O modules, managing cables, and using the circuit builder. Hands-on exercises representing real-world design scenarios for the JIC (U.S.) standard are included.

Cost: \$325 per day plus a \$100 fee for a manual which must be purchased for enrollment.

The class breakdown will be as follows:

Day 1

- Creating Wire Types
- Using Reference Files
- Drawing & Project Properties
- Creating Drawing Templates
- Installation and Search Paths
- Custom Components and Panel Footprints
- Managing and Editing Databases
- Updating Title Block Attributes

Day 2

- Updating Schematics from Spreadsheets
- Generating Automatic Reports
- Working with Autodesk Vault
- Using PLC I/O Modules
- Managing Cables
- Using the Circuit Builder

- Lunch is included.
- Class is from 8:30 a.m. to 5:00 p.m.
- Students will receive a certificate upon completion.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.
