Class Outline & Syllabus

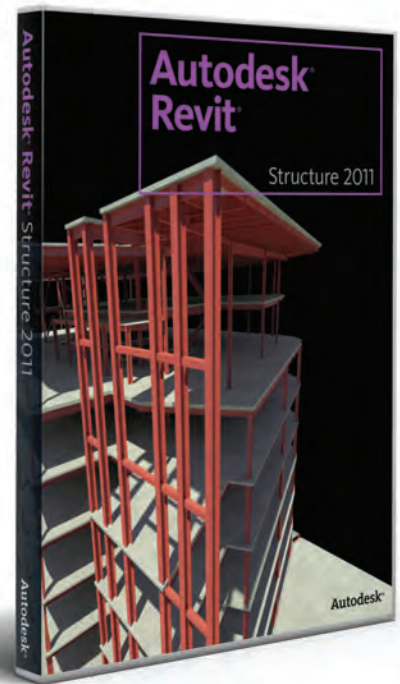

Revit Structure Intermediate

Course Length: 2 day (16 hours)

Objective: This course will introduce students to the more advanced techniques and concepts beyond those learned in Revit Structure Fundamentals. It is intended to maximize your use of Revit Structure by broadening your knowledge in regards to working with families, family creation, creating trusses, project sharing, preparing the Revit analytical model for analysis, and working with other formats.

Prerequisites: Revit Structure Fundamentals. It is highly recommended students have experience and knowledge in structural design and terminology.

Cost: \$325 per day plus a \$100 fee for a manual which must be purchased for enrollment.

The class breakdown will be as follows:

Day 1

- Creating Families
- Creating Trusses

Day 2

- Project Team Collaboration
- Structural Analysis
- Working with Other Formats

- Lunch is included.
- Class is from 8:30 a.m. to 5:00 p.m.
- Students will receive a certificate upon completion.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.
