

Revit® Architecture Advanced

Objective: Broaden your knowledge of Revit® in the areas of Conceptual Design and BIM Management by exploring exercises in mass studies, space planning, visualization, rendering and creating custom families.

Course Length: 2 days (16 hours)

Day 1

Conceptual Design

- Massing Studies
- Space Planning & Area Analysis
- Visualization
- Rendering

Day 2

BIM Management

- Creating Custom Templates
- Custom Walls, Roofs, & Sections
- Family Concepts & Techniques
- Creating Specific Families

- Lunch is included.
- Class is from 8:30 a.m. to 5:00 p.m.
- Students will receive a certificate upon completion.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.

Prerequisites: A working knowledge of basic design/drafting procedures and terminology as well as Windows XP or Windows 7. Revit® Architecture Intermediate or equivalent training or experience is highly suggested.

Cost: \$325 per day plus a \$100 fee for a manual which must be purchased for enrollment.

Continuing Education Units

Ask Repro Products about earning credits for mandatory Continuing Education classes (including the American Institute of Architects - AIA) and other professional development programs.
