

REPRO PRODUCTS

Repro Products is committed to reducing our carbon footprint and facilitating the greening of our customers as well. All of our locations participate in recycling programs of all approved paper materials, cardboard, aluminum and plastic. Reprographics has traditionally been a paper-based business, but at Repro Products we understand that in the United States, wetlands are lost at a rate of about 600,000 acres per year and it is important to promote both the use of recycled products and on-line plan rooms that provide distribution in electronic format as well as paper.

Let Repro Products help you **GO GREEN** with:

Recycled paper

- We have both inkjet and bond paper available for your wide-format machines
- We also use recycled paper for your print jobs (upon request)

Remanufactured ink cartridges

- We sell remanufactured ink cartridges for HP models 500, 800, 1050 and 5000
- We also accept empty cartridges for recycling

Digital document management

- Choose digital documents and plans for projects, print only what you need and store your plans digitally

Autodesk's model-based design technologies create accurate models that enable:

- Energy and daylighting studies
- Material computation and quantification
- Specification integration
- Waste reduction
- Design optimization

Call Repro Products, together we can help save our planet 770-434-3050
