

AutoCAD®: 3D Drawing and Modeling

Objective: To introduce users who are proficient with AutoCAD® 2D commands to the methods and concepts of 3D modeling. Gain a thorough grounding in 3D fundamentals and explore the main features of the 3D environment.

Course Length: 3 days (24 hours)

Day 1

- 3D Foundations
- Simple Solids
- Creating Solids & Surfaces

Day 2

- Modifying in 3D Space
- Advanced Solid Editing
- Additional Editing Tools

Day 3

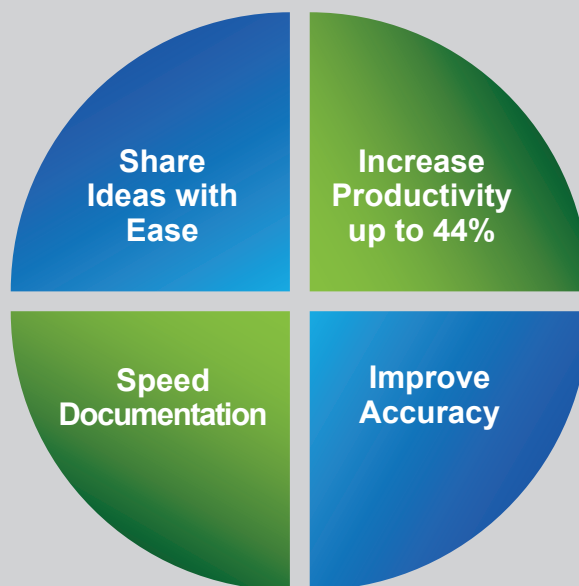

- Refining the View
- Visualization
- Working Drawings from 3D Models
- Working with the User Coordinate System

- Lunch included for onsite classes at Repro Products' Authorized Training Center.
- Class is from 8:30 a.m. to 5:00 p.m.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.

Prerequisites: Students must possess a good working skill level with AutoCAD® before taking this course. A minimum of 80 hours of work experience with AutoCAD® is recommended.

Continuing Education Units

Ask Repro Products about earning credits for mandatory Continuing Education classes (including the American Institute of Architects - AIA) and other professional development programs.

Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

Call 678-486-3171 to schedule your training.
