

AutoCAD® Electrical Fundamentals

Objective: Discover the many AutoCAD® Electrical utilities that enable users to quickly create and manage electrical-controls production drawings. Users focus on how to build intelligent ladder diagrams and panel layouts, and how to leverage the intelligence built into AutoCAD® Electrical. Hands-on exercises representing real-world design scenarios for the JIC (US) standard are included.

Course Length: 4 days (32 hours)

Day 1

- Wires and Ladders
- Wire Numbers and Leaders
- Inserting Schematic Symbols

Day 2

- Terminals, Multiple Level Terminals & Jumpers
- Circuits & Multiple Phase Circuits
- Update and Retag Drawings

Day 3

- Creating Wire Types
- Creating Drawing Templates
- Custom Components and Panel Footprints

Day 4

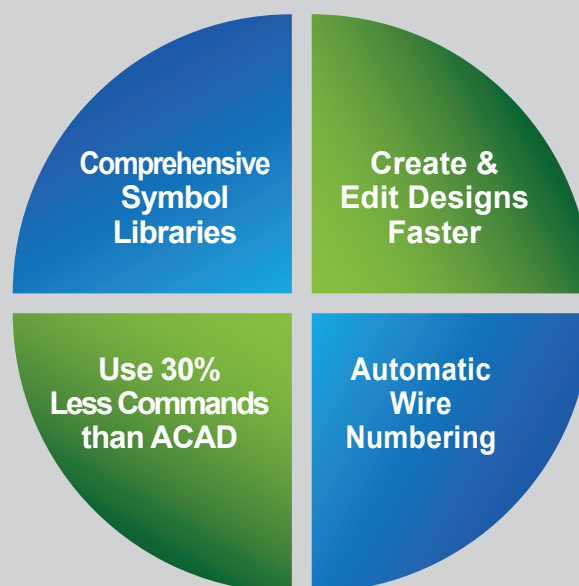

- Updating Schematics from Spreadsheets
- Generating Automatic Reports
- Using the Circuit Breaker

- Lunch included for onsite classes at Repro Products' Authorized Training Center.
- Class is from 8:30 a.m. to 5:00 p.m.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.

Prerequisites: A working knowledge of basic design/drafting procedures and terminology as well as Microsoft Windows 10.

Continuing Education Units

Ask Repro Products about earning credits for mandatory Continuing Education classes (including the American Institute of Architects - AIA) and other professional development programs.

Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

Call 678-486-3171 to schedule your training.
