

AutoCAD® Fundamentals - 2

Objective: This course builds on AutoCAD® Fundamentals - 1 with more sophisticated methods to extend your knowledge of the program.

Course Length: 2 days (16 hours)

Day 1

- Working Effectively with AutoCAD®
- Accurate Positioning
- Projects – Productivity Tools
- Working with Blocks
- Projects – Creating & Organizing Blocks

Day 2

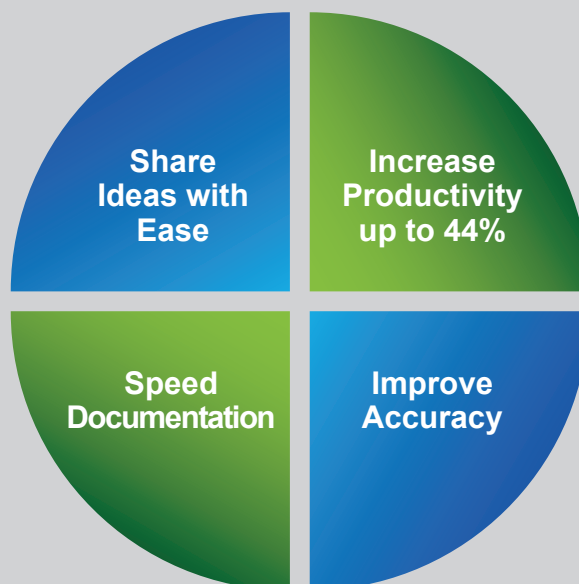

- Creating Templates
- Annotation Styles
- Projects – Drawing Setup & Utilities
- Advanced Layouts
- External References
- Projects - Drawing

- Lunch included for onsite classes at Repro Products' Authorized Training Center.
- Class is from 8:30 a.m. to 5:00 p.m.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.

Prerequisites: A working knowledge of basic design/drafting procedures and terminology as well as Microsoft Windows 10. AutoCAD® Fundamentals - 1 or equivalent training is highly suggested.

Continuing Education Units

Ask Repro Products about earning credits for mandatory Continuing Education classes (including the American Institute of Architects - AIA) and other professional development programs.

Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

Call 678-486-3171 to schedule your training.
