# Sending your files to

REPRO PRODUCTS

is easy, fast & secure

FetCher

Repro Products uses the ground-breaking **Fetcher service** for file transfer. Fetcher's file exchange service is:

► **Unlimited** -- no limits on the size, quantity or types of files being sent or received

► **Secure** -- files will be saved in hidden folders during the upload process and moved away from the public access area after the upload is complete

► **Intuitive** – simply fill in a form like the one to the right.

You can access our file transfer service through our website at **www.reproducts.com**. Just click on the "Submit Files" button to access the File Transfer Form and drag and drop the files to be transferred into the form.
