Color Duplex Desktop Scanner

Get paperwork out of the way with this powerful desktop scanning solution

The Fujitsu fi-6110 scanner's small footprint and advanced feature set make it an ideal solution for decentralized scanning environments. With its true, 600-dpi optical resolution and dual-CCD cameras, it captures your documents' finest details in color, grayscale, and monochrome. What's more, it shares much of the advanced technology found in higher-end scanners, including a 50-sheet automatic document feeder (ADF) that accommodates a wide range of document sizes (2.1 in. x 2.9 in. to 8.5 in. x 14 in.), ultrasonic double-feed detection for greater security, and a Carrier Sheet function for feeding fragile or oversized (A3) documents. Plus at speeds up to 20 ppm (simplex) / 40 ipm (duplex) it quickly and efficiently transforms your paper documents into more manageable digital files. PaperStream IP and PaperStream Capture utilities are included with the Fujitsu fi-6110 scanner, which allow you to quickly and easily integrate it into your workflow.

Fleet Management

Scanner Central Admin provides IT departments an efficient way to manage medium to large scanner deployments. With remotely accessible fleet information, IT departments can now allocate resources effectively based on scan volume, consumable wear, depreciation schedules and maintenance expiration.
