

Revit® Architecture Intermediate

Objective: Take your Revit knowledge to the next level. This Intermediate class will cover how to work with multiple Revit models/persons simultaneously. You will learn how to create multiple design iterations in a single model, how to collaborate with others properly within the Revit environment and how to create site context. The course will also teach you how to create beautiful renderings by utilizing visualization tools to enhance your final designs. Come take this challenging course which will cover these topics, and more, to push your Revit skills to the next level.

Course Length: 3 days (24 hours)

Day 1

- Phasing, Design Options & Groups
- Linking Models
- Importing & Exporting Data
- Project Team Collaboration

Day 2

- Site Design
- Structural Tools
- Massing Studies

Day 3

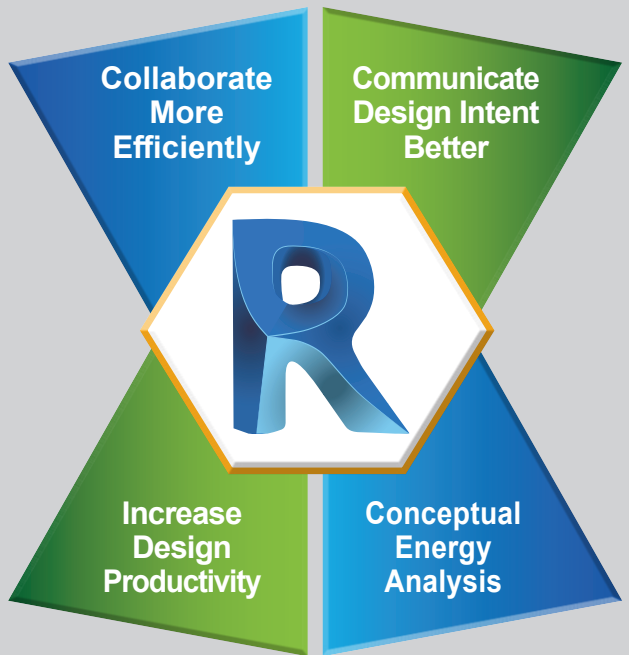

- Space Planning & Area Analysis
- Visualization
- Rendering

- Lunch included for onsite classes at Repro Products' Authorized Training Center.
- Class is from 8:30 a.m. to 4:30 p.m.
- After completion of an entire class, students may audit the same class for one year, if space is available in the class.
- The entire class is purchased at one time, but individual days may be attended sequentially over several months.

Prerequisites: A working knowledge of basic design/drafting procedures and terminology as well as Windows 10. Revit® Architecture Fundamentals or equivalent training is highly suggested.

Continuing Education Units

Ask Repro Products about earning credits for mandatory Continuing Education classes (including the American Institute of Architects - AIA) and other professional development programs.

Advantages to Training at Repro Products' Autodesk® Authorized Training Center:

- Learn from our Autodesk Certified instructors at our superior facilities.
- Receive Autodesk® recommended content from Autodesk® Official Training Guides.
- Get your hands on sample projects and exercises that emphasize real-world application.

Call 678-486-3171 to schedule your training.
